DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-19, drawn to a surgical device, classified in class 606, subclass 1.
 - II. Claims 20-35, drawn to a method for an ophthalmic surgical procedure, classified in class 606, subclass 1.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions II and I are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case the apparatus of invention I may be used to practice another and materially different process including surgical procedures other than ophthalmic surgical procedures.

3. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.

4. A telephone call was made to Lisa Hazzard on February 25, 2003 to request an oral election to the above restriction requirement. A voicemail was left, but ~~was~~ the phone call was not returned.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
